Why my links are not indexed or appear in backlinks checkers?

Generally getting your links indexed is important for SEO. There is a premium indexer service as extra with all of our services, it gives a high indexer rate.

Indexing your links mean that Google search index these links, and know about it

The second point is the backlinks checkers, such as Google webmasters tools and Ahrefs, it takes more bit time after your links indexed in Google search, about 2 weeks and up to 3 months.

Google webmaster's tools will show just a few of your total links.

We believe that Ahrefs spiders is less powerful than Google but it's still faster and should index most of the backlinks but after about 2 weeks and up to 3 months of getting these links indexed in Google search.

Are backlinks permanent?

The links are permanent in normal cases, as we use high-quality unique articles in submission and also submit in high-quality sites, but in few cases, the sites may bulk delete accounts/articles or sites may down after some time, so it's about 80% permanent.
